

Snohomish PUD Electric Vehicle Charger Terms & Conditions

Snohomish County PUD (PUD) offers an Electric Vehicle Charger Rebate to customers who purchase and install an Energy Star certified Level 2 Connected EV charger at their residence within PUD's service territory.

Homeowner agrees to be contacted about and participate in future PUD EV charger programs, and agree to provide, or authorize the EV charger manufacturer to provide, PUD access to their charging data. The data collection will be used to conduct research on EV charging patterns and their collective effect on PUDs electrical system and develop strategies to mitigate their impact.

In addition, Homeowner expressly agrees that the PUD may release the Homeowner's account information, including billing and energy usage information, to an independent third-party evaluator solely for the purposes of evaluating this program, confirming energy savings, and for other quality assurance purposes.

This consent takes effect on the date of installation of the electric vehicle charger or the rebate application date, whichever is later, and remains in effect for five years.
